ACADEMIC PROJECTS

1. MarVista. Market Intelligence & Visualization Tool (Full-Stack Website)

- Developed a "Digital Twin" preview platform for physical marketplaces, enabling users to perform remote reconnaissance on inventory and pricing.
- Integrated a "Telescope" UI philosophy, allowing consumers to overcome "item choosing complexity" by visualizing market layouts and stock status before physical transit.
- Technologies used: [React js, Tailwindcss, Node js, Express js, MongoDB, mongoose.]

2. Kenenisa's Portfolio. (Full-Stack Website)

- Dynamic portfolio website using React, Framer Motion animations, and Tailwind CSS to demonstrate full-stack development capabilities through interactive project demonstrations.
- Github Link : <https://github.com/Kenenisa1/My-Portfolio>

3. Furniro Website (Frontend Website)

- "Furniro – a fully functional furniture store frontend. This React application simulates an online shopping experience with a product catalog, detailed views, and a responsive design."
